

ELECTRIC SCISSORS

SJ16

The SJ16 self-propelled vertical mast lift provides a compact footprint and superior manoeuvrability. When operating in tight workspaces, a high degree steer angle allows for superior functionality and flexibility by offering zero inside turning radius. Both models feature a 20in (0.51m) traversing platform, providing increased access and the ability to reach over potential obstacles. A unique slide away platform provides easy access to components, when raised or in the stowed position.
