

ELECTRIC SCISSORS

1330

The 1330 has a maximum capacity of 240kg (529lbs) and is designed to easily pass through standard doors and access elevators. Its exclusive open chassis reduces daily maintenance time, and its DC motor drive provides a longer runtime. Other features include a maintenance-free battery, an automatic braking system, driving at hull height, proportional controls, an integrated hand shield, an overhead anti-collision device, an emergency lowering system, a fault diagnosis system, an automatic pothole guard, a forklift pocket and lifting eyes are all included.

Specifications

Working Height	5.8m
