

GAS SCISSOR LIFTS

4390

The 4390 rough terrain scissor lift is designed for superior performance in challenging outdoor environments. It features 4-wheel drive with positive traction control for excellent terrainability, a 50% gradeability rating, and a standard 1.52 m (5 ft) front slide-out extension deck with optional dual and super-deck packages. The slide-out engine trays provide easy access to components, while on-board diagnostics make troubleshooting simple. With a capacity of up to 7 people onboard, this lift is built to last and increase operator productivity on demanding worksites.
