

SPECIALIST MACHINES

20M SPIDER

The 20m reduces travel and set-up time, for increased productivity. One touch of a button takes care of outrigger deployment and levelling, as well as retraction once the job is done. Other efficiency-boosting features include auto-speed control which factors in ground conditions; and wireless remote control. With a minimum travel width of less than 0.8m and stowed height of less than 2m, this compact lift can pass through narrow door and gateways.

Specifications

Working Height	20.15m
Platform Height	18.15m
Overall Length	5.01m
Stowed Height	1.99m
Deck Extension	N/A
Width	0.80m
Weight Overall	2800kg
Cage Capacity	230kg
Horizontal Outreach	9.70m
Fold-down Hardrail	N/A
