

FORKLIFTS

FLT25

The FLT25, is a strong and exceptionally versatile performer. Its compact design makes it ideal for working in narrow isles widths. Its forward reach allows for single-side loading, reducing double-handling and keeping operators clear of hazardous environments. The telescopic boom offers many benefits, including unrivalled visibility due to its non-obstructive mast which improves site safety. 111 degrees of carriage rotation makes handling of unpalleted goods much easier and safer, while also requiring 50% less loading space in congested yards.
