

### ELECTRIC/BI-FUEL BOOMS

# HR17 HYBRID

The HR17 Hybrid is a revolutionary work platform that combines advanced power-source technology with efficient 4x4. It has a compact and low-weight design, allowing it to deliver outstanding performance. The Hybrid system can automatically use its electric motor to boost power when needed, reducing fuel consumption and emissions. Additionally, the machine can operate on battery alone, making it suitable for indoor, quiet or clean applications.

## Specifications

Working Height	17.2m
Platform Height	15.2m
Overall Length	6.30m
Stowed Height	2.15m
Deck Extension	N/A
Width	2m
Weight Overall	5000kg
Cage Capacity	225kg
Horizontal Outreach	9.40m
Fold-down Hardrail	N/A
