

### TELEHANDLER

# TH10

The HTL3510 is the perfect choice for those looking for a compact, powerful and reliable machine to tackle tougher applications. Its hydrostatic transmission provides an unequalled driving smoothness, while its 3 steering modes and tight turning radius make it highly manoeuvrable and easy to handle in small areas. The Kohler Tier 4 final engine offers fuel savings and simplified maintenance without the need for a DPF or AdBlue (SCR). With its great compactness of less than 5 meters and high 360° visibility, the HTL3510 ensures all-day comfort and safety.

## Specifications

Max Lift Height	10m
Platform Height	2.42m
Overall Length	4.96m
Stowed Height	N/A
Deck Extension	N/A
Width	2.26m
Weight Overall	8570kg
Max Lift Capacity	3500kg
Horizontal Outreach	7.2m
Fold-down Hardrail	N/A
