TH4

The TH4 offers a revolutionary solution to those who need compact size and manoeuvrability, excellent lift height, lift capacity and reach, and the ability to work in restricted height buildings. Its innovative off-set single-spine chassis has its core strength under the boom and wraps around the cab, allowing for a lower cab position which provides three key benefits: improved visibility, increased stability and greater manoeuvrability.

Specifications

Max Lift Height	4.04m
Platform Height	1.80m
Overall Length	3.23m
Stowed Height	N/A
Deck Extension	N/A
Width	1.56m
Weight Overall	3421kg
Max Lift Capacity	1600kg
Horizontal Outreach	2.53m
Fold-down Hardrail	N/A
