

DIESEL BOOM

Z45

The Genie® Z[®]-45/25J RT articulating boom lift is the perfect choice for outdoor construction and industrial applications. It offers a combination of up, out and over positioning capabilities with an impressive outreach, as well as a tight turning radius and zero tailswing for easy manoeuvring in confined work areas. This model also features a full-time active oscillating axle to maintain traction on rough terrain, 4WD and 45% gradeability for superior terrainability, dual parallelogram and fully proportional controls for precise boom positioning.
