

DIESEL BOOM

Z60

The Z60's zero tail swing means that the machine can easily be manoeuvred and the 360° continuous turntable rotation makes it popular for working in restricted areas.

The articulated boom with a 2m jib allows this machine to access hard-to-reach areas. The Z-0 Rough Terrain self-propelled articulating boom handles the most challenging high-reach jobs. It is able to negotiate tough job sites effortlessly.
